PROFIL

Hello. I'm experienced **Front-end Developer** with more than 5 years of engineering experience. I have developed front-end apps, mobile apps. My career path took me through various settings from stages when a product exists only as a concept up to bringing code to production and doing further maintenance, performance optimization and additional feature implementations.

PROFESSIONAL EXPERIENCE

Front end developer

Vaionex - USA - Since November 2021

- Worked with an experienced team of web and app developers that can build professional blockchain platforms within days.
- Developed and maintained responsive user interfaces using Next.js, TailwindCSS.
- Utilized Redux (redux toolkit) for state management across react components.
- Utilized firebase for database.
- Created reusable React components that were easily testable and could be shared across projects

Front End Developer

Noqta - Tunis - From April 2018 to October 2021

- Developed and implemented front-end solutions for web applications using modern JavaScript frameworks (Nextjs, Reactjs, Angular4+, Vuejs...).
- Collaborated with the team to design new features and enhancements of existing systems.
- Created reusable components that can be used across multiple projects as well as optimized code for performance in large scale applications.
- Used Git version control system to manage source code changes and collaborated with other developers on tasks when needed.

UI Developer

UPWORK - Remote Job - From June 2017 to December 2017

- Managed website development from the initial stage to the completion stage.
- Developed web apps using HTML, CSS, and JavaScript.Implemented improvements in web responsiveness and functionality.

EXAMPLES OF PROJECTS

My2cents : my2cents.io | a social super app beyond web 3
My2cents is a new web 3.0-centered social media platform based on BSV Blockchain.

my2cents empowers users and allows them to earn an income through an on-chain economy with an ad-revenue share model where they can receive money for the content and services they publish and offer respectively, and receive ad revenue proportional to their UserScore on my2cents.

Technologies used: **Nextjs, TailwindCSS, Firebase, Rest api blockchain**

Dojo Discover : Investor Platform
Dojo Discover, or DODI for short, provides investors and prospective investors with deeper and earlier insight to each of the blockchain start-ups.
Once investors have set up an account they can follow any of the start-ups that interest them. The start-ups profile feature the key details about the companies, key updates as and when, and core documents, The platform also has a chat function so investor can chat directly with the start-up founders!

Technologies used: **Nextjs, TailwindCSS, Firebase, Rest api blockchain**

SKILLS

Skills :
- ✔️ HTML5 & CSS3 & SCSS
- ✔️ Tailwind & Bootstrap & Material UI
- ✔️ Javascript & TypeScript
- ✔️ ReactJS & NextJS
- ✔️ VueJS
- ✔️ Angular 4+
- ✔️ Redux & Rest Api
- ✔️ Flutter & Firebase
- ✔️ NPM & YARN & GIT
- ✔️ Agile & Clickup & Jira
- ✔️ Github & Vercel Deployments

ÉDUCATION

Bachelor of Mathematical Sciences

Secondary High School - Tunisia - From 2007 to 2010

Applied license in computer technology

Higher institute of technological studies of siliana - Tunisie
- From 2012 to May 2015
